MINDS IN THE MAKING

TRIAGE Student Contract

Team Researchers in a GLOBE-al Environment (TRIAGE) is an after-school, extra-curricular program, focusing on authentic research with middle school students and their teachers.

- I understand that, as a participating student, I play a key role in my team's research at the Bunker Interpretive Center (BIC) and am therefore committed to my team as well as the research goals of TRIAGE.
- I understand that my participation in TRIAGE includes a mandatory 2-week Student Research Institute at Calvin College during the summer; I will choose from one of the 2 scheduled Institute times to participate in this day program (~9:00am - 5:00pm).
- I realize that my commitment is for the course of one CALENDAR year (i.e., from January, 2008 through December, 2008).
- Barring emergencies and limited family scheduling constraints, I am committing to weekly TRIAGE participation ("OST"); when I am unable to attend on my scheduled day, I will attend on a different day that week.
- **I commit to attaining 150 hours of participation time with TRIAGE outside of my regular school day. This includes up to 80 hours of participation in the summer Student Research Institute.**
